

Shopify Order Management System

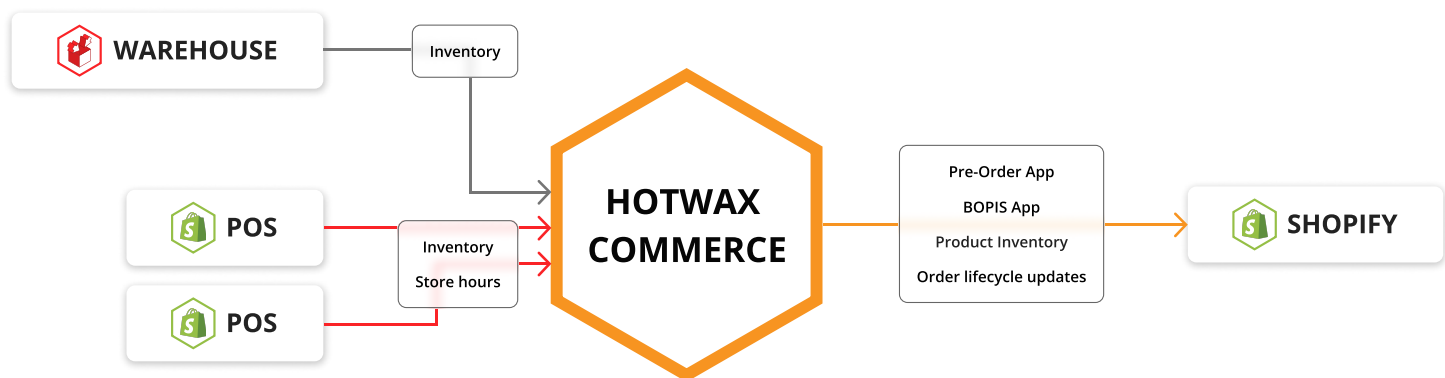

The HWC OMS allows Shopify storefronts to instantly offer same-day Buy Online Pick-Up In Store, start shipping from store, and take pre-orders.

INSTALLING THE APP

HotWax Commerce OMS is a custom app that can be installed from apps.hotwax.co to instantly connect HotWax Commerce to a Shopify store.

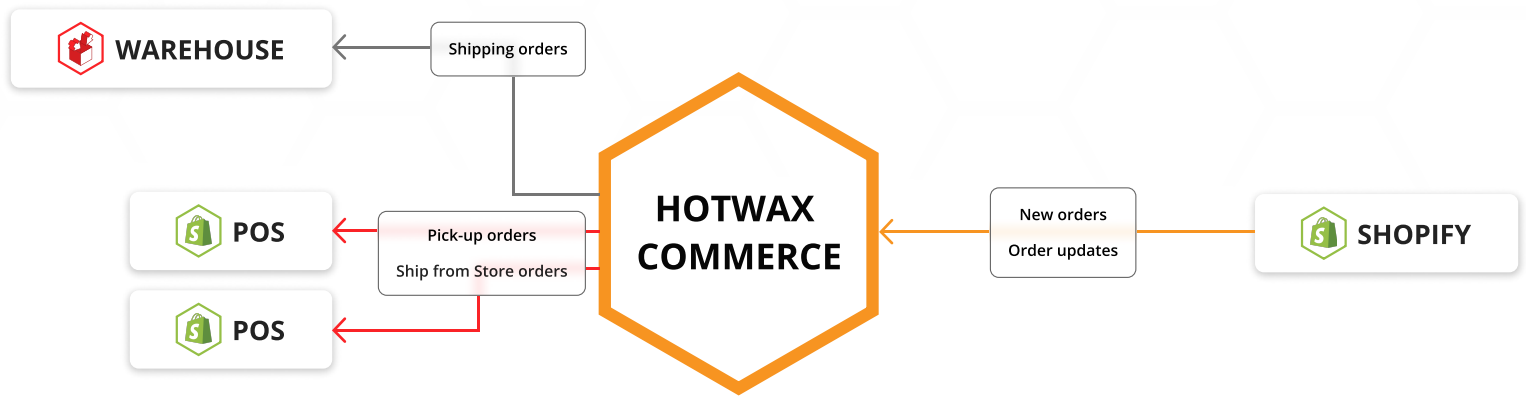

WHAT THE APP DOES OUT OF THE BOX

After you install our custom app, HotWax Commerce automatically downloads all of your product data and orders while also syncing inventory from your stores and warehouses. All uploads and downloads to Shopify happen out of the box with no changes to your storefront.

UPLOADS

HotWax Commerce will automatically update product inventory and order statuses on Shopify using scheduled jobs. All of your product data remains intact, and you will continue to manage product data in Shopify like before.

DOWNLOADS

HotWax Commerce periodically downloads new orders and order updates and sends them for fulfillment when inventory becomes available. Pick-up orders are sent to our Shopify POS BOPIS app in real time to enable same-day pick-up.
